Response to Amendment

The amendment filed on 1/29/2004 has been considered but is ineffective to overcome the Mandell reference.

For detailed explanation regarding the rejection of the claims see the previous office action.

The claim objection has been withdrawn.

Response to Arguments

Applicant's arguments filed on 1/29/2004 have been fully considered but they are not persuasive. Applicant argues claiming that Mandell does not suggest "a decoder simultaneously and separately receiving a "first signal" and a "second signal". the examiner disagree and submits that Mandell shows in figure 9, where a first input representing a high frequency signal (background signal) is separately received by the decoder at block 402 and a second input representing a low frequency signal is separately received by the decoder at block 404.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
